

# Venen Engel Lymph-Flow Pants

The new Venen Engel Lymph-Flow Pants are more efficient, effective and aesthetic than their predecessors. For the first time, the leg circumference can be adjusted to the individual leg anatomy by three separate zippers each for upper and lower leg. This means that the pressure is applied equally to legs of different circumferences and the massage quality is increased. Due to the perfect fit and overlapping air chambers, the volume per chamber is optimized in such a way that more massage passes are possible in the same time. The Lymph-Flow Pants are available individually from €649 or with control unit for €2,299. For more information, visit [venenengel.de](http://venenengel.de).
